2026-2027 SPONSORSHIP PACKAGE

FUELED BY PASSION. BACKED BY YOU.

FORMULA SAE

Patriot Motorsports is George Mason University's Formula SAE team, where students design, manufacture, and race a formula-style car against universities nationwide and internationally. Judged across events including technical inspection, cost, presentation, engineering design and endurance, the competition offers students a unique opportunity to apply classroom knowledge to real-world engineering challenges and business cases, bridging the gap between academia and industry.

Founded in 2018 and progressing largely in 2025–2026 school year, what makes Patriot Motorsports unique is that it's not just engineering; the team operates like a startup, with opportunities in sponsorship outreach, business case competition, and social media and marketing. We are currently working toward building our first drivable car to take to competition in May 2027!

VISION STATEMENT

**WE AIM TO PROMOTE INCLUSIVITY
AND CONTINUOUS LEARNING BY
PROVIDING A SUPPORTIVE
ENVIRONMENT WHERE
STUDENTS CAN DEVELOP
TECHNICAL SKILLS IN
A MOTORSPORTS
REALM.**

BUILDING THE CAR AND COMPANY

Patriot Motorsports began in a student's garage. What started as a few students with a dream has grown into a full team with its own prototype bay at George Mason's Science and Technology campus in Manassas. After an extensive chassis redesign, we are now in full manufacturing, backed by material analysis and finite element analysis (FEA). Our Powertrain team is developing the engine and differential mounting and packaging, and our Electrical team has mapped the entire system and is designing the wiring harness ahead of fabrication. Two senior capstone projects are also underway: one is creating a front and rear wing aero package, and the other is designing and building a custom differential.

SUBTEAMS

CHASSIS

Following an extensive redesign, the Chassis team has moved into full manufacturing. Over the past year, the team researched the optimal weight, material, and geometry for the frame, validated the design through material analysis and finite element analysis (FEA), and completed the full chassis model in SolidWorks. In parallel, a dedicated aerodynamics subteam is researching aero concepts and vehicle setups to prepare for practical testing once the car is complete.

POWERTRAIN

This semester, the Powertrain team focused on building the foundation of the car's drivetrain and packaging architecture, prioritizing reliability, serviceability, and performance while staying compatible with the new chassis. Working closely with the Chassis and Drivetrain groups, the team refined the CAD model of the engine placement, engine mounts, and differential mounts. Modeling these components early let them catch interference zones, confirm chain line alignment, and optimize the car's overall mass distribution before any parts were manufactured.

ELECTRICAL

The Electrical team has identified every component and connection in the car's electrical system, including wiring, connectors, fuses, relays, the display, and driver controls. They built a detailed spreadsheet mapping each connection and wire run, which ensures the correct wire gauges and connectors are ordered the first time. The team is now developing the computer-based wiring harness design in preparation for fabrication.

PARTNERSHIP BENEFITS

RECRUITMENT

Your brand can be displayed on our vehicle, website, posters, team apparel, and in our workspace. Our members are active college students who seek career opportunities every summer, so sponsoring us also gives you a steady flow of talent. They bring hands-on engineering experience, teamwork, and project management skills.

EXPOSURE

The annual FSAE competition brings together 120 teams and draws a large audience of businesses and spectators. Our sponsorship proposal is also your business opportunity.

This past year, Patriot Motorsports attended the SAE Government/Industry Meeting in Washington, D.C., Whiskey and Widgets in April, and the Capstone Senior Design Showcase in May. In 2024, we were also invited to the Red Bull Show in D.C., which drew an estimated 50,000 attendees. Events like these showcase our partnership with you, and your sponsorship lets us keep attending them and displaying your brand.

TIERS

HOW WE CAN WORK TOGETHER

While Patriot Motorsports is appreciative of all sponsorships, we benefit most from four different types: monetary sponsorship, material and equipment donations, mentorships and access to specialized facilities. Additionally, your contribution is tax deductible to the fullest extent allowed by law. George Mason University Foundation, Inc. is a registered 501(c)(3) organization (EIN: 54-1603842).

1 Friend of Mason \$500+ (\$65 in benefits)

- ✓ Logo on website
- ✓ Logo on the car
- ✓ 1 Social Media Shoutout

2 Green \$1,500+ (\$105 in benefits)

- ✓ Logo on website
- ✓ Logo on the car
- ✓ 1 Social Media Shoutout
- ✓ Logo on event poster
- ✓ Logo on competition shirts
- ✓ Private workspace tour

3 Gold \$2,500+ (\$205 in benefits)

- ✓ Logo on website
- ✓ Logo on the car
- ✓ 2 Social Media Shoutouts
- ✓ Logo on event poster
- ✓ Logo on competition shirts
- ✓ Private workspace tour
- ✓ VIP access to car unveiling
- ✓ Invite to test day
- ✓ Engineering mentorship & design reviews

Patriot \$10,000+ (\$280 in benefits)

- ✓ Logo on website
- ✓ Logo on the car
- ✓ 2 Social Media Shoutouts
- ✓ Logo on event poster
- ✓ Logo on competition shirts
- ✓ Private workspace tour
- ✓ VIP access to car unveiling
- ✓ Invite to test day
- ✓ Engineering mentorship & design reviews
- ✓ Dedicated social media spotlight
- ✓ On-site presentation / car display
